

INS350LED

FEATURES:

CERTIFICATES AND APPROVALS:

PZH certified

COMMON APPLICATIONS

CHEMICAL PLANTS

CHEMICALS WAREHOUSES PHARMACEUTICAL **PLANTS**

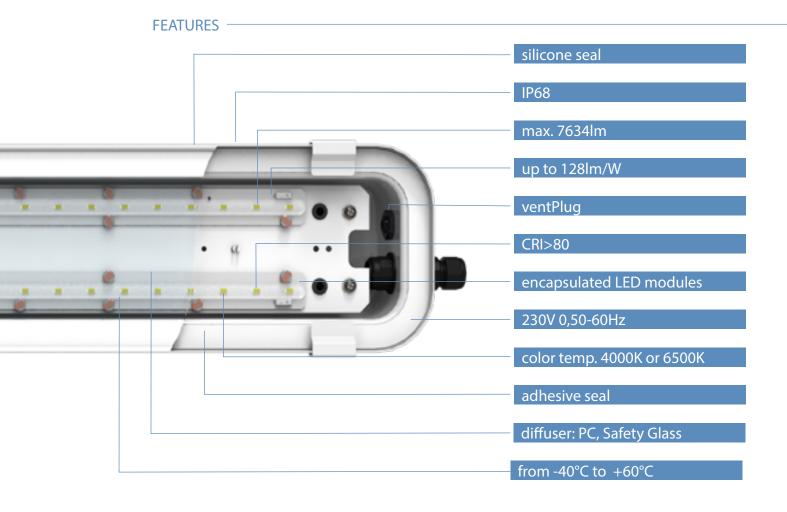

ANIMAL HUSBANDRY

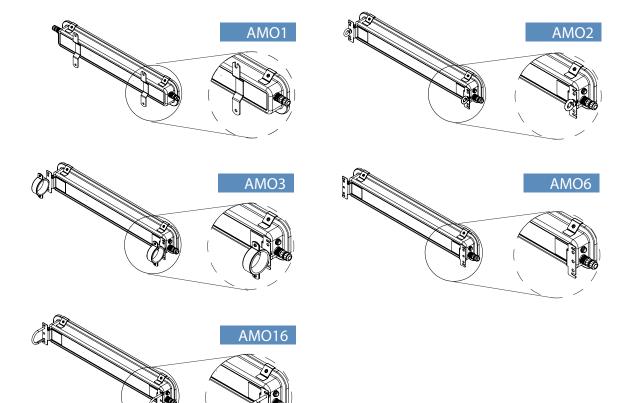

DELICATESSEN DAIRY FACTORIES

Water and dustproof industrial light fixture with encapsulated LED modules designed for use in highly corrosive environments. Housing made of stainless steel with increased acid resistance, diffuser made of safety glass or PC. Easy and quick assembly that does not require interference inside the light fixture. Special

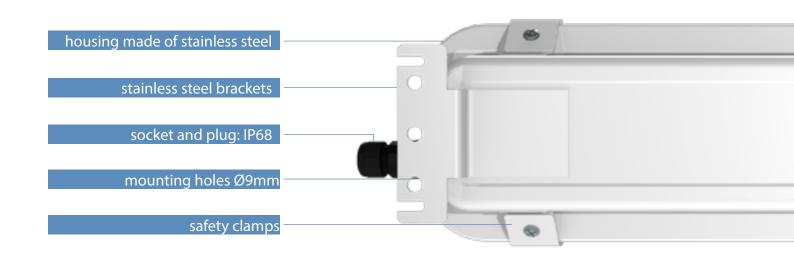

Light fixture has PZH approval. Light fixture can be made with DALI control system.

PC - CLEAR type polycarbonate SGL - laminated tempered glass

ADDITIONAL INFORMATIONS

Tempered laminated glass is a multi-layer safety glass that has greater resistance to heavy objects. The foil between the glass prevents the glass from spilling.

Characteristic for tempered glass is the way of cracking after breaking into small pieces.

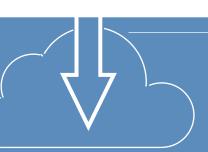

Version with plug&socket set, so it is not needed to open the fitting during installation. This solution allows fast assembly and simplifies further exploatation.

C4 - special version of the luminaire designed for use in an atmosphere of high corrosiveness. All external, metal elements of the light fitting are made of stainless steel. LED modules are made in a hermetic version, which ensures a long lifetime.

Optional DA version of the light fitting is equipped with an integrated power supply unit with DALI interface, which allows to control parameters of lighting - depending on data from motion sensors or BIM settings. Properly configured lighting control system can significantly reduce costs of energy and improve the ergonomics of users.
